Springfield, IL 62794-9276

Dear Jeff:

I am returning the Geraghty and Miller reports to you. We have made copies for our records. The reports have been very helpful in defining the extent of contamination in certain subregions of our study area. We hope that our sampling this fall and spring will help determine if contamination is wide-spread, or if it is localized.

For your information, we have decided to purchase an OVA 128 portable organic vapor analyzer for our drill rig. A representative of Foxboro came to the Water Survey on August 17, 1988, to demonstrate the equipment and we were impressed with it.

It looks as if drilling in the Metro-East area won't begin until mid September. We hope to have the chemical analyses of the first round of sampling by Christmas. I'll be sure to let you know if we find anything unusual.

Thank you for all your help.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Ken'.
